

SAYANA RAJU

Software Engineer | MSc Computer Science (Aarhus University)

+45 71506676 | sayanaraju97@gmail.com | www.linkedin.com/in/sayana-raju | Aarhus, Denmark

PROFILE

Software Engineer with 5+ years of experience architecting and scaling customer-facing web applications, with deep expertise in Angular, React, TypeScript, RxJS, and component-driven architecture. It is backed by hands-on backend experience integrating REST APIs and services in Python, C#/.NET, and Java/Spring Boot. Experienced owning features end-to-end - from stakeholder requirements through implementation to post-release follow-through - and driving engineering standards through code reviews, testing discipline, and reusable component design.

Comfortable working across the full Angular/React and Java/.NET ecosystem, from state management and Standalone Components to performance optimisation. A collaborative, people-first engineer who thrives in cross-functional agile teams, working closely with UX/UI designers, developers, and product owners to ship resilient, high-quality features end-to-end. Experienced integrating Angular front ends with RESTful APIs and comfortable operating in CI/CD-driven environments. Known for picking up new frameworks and tools quickly, taking ownership beyond just code, and communicating clearly across distributed, international teams.

Core Strengths: Angular & RxJS | React | TypeScript / OOP & SOLID | Component & Design-System Architecture | Cross-functional Agile Collaboration | CI/CD & Cloud

EDUCATION

MSc Computer Science (Data Science & AI)

Aarhus University, Denmark | Aug 2024 - June 2026

B.Tech – Information Technology

KTU, India | 7th Rank Holder | July 2015 - June 2019

WORK EXPERIENCE

IT Engineer

ECE/TECH Dept, Aarhus University | Aarhus, Denmark | Aug 2024 - present | Student Job/Part Time

- Developing and maintaining Overleaf platform, implementing multiple features including OAuth authentication for university employees using React, Typescript and Javascript.
- Built and shipped features and internal dashboards using React and Typescript with Python automation scripts supporting recurring infrastructure tasks.
- Developed automated unit tests to improve reliability and support continuous development.
- Integrated Microsoft Entra ID (OIDC) Single Sign-On (SSO) into the application, configuring OAuth/OIDC authentication and implementing the authentication flow in code.

Web Developer

International Centre, Aarhus University | Aarhus, Denmark | Sep 2024 - June 2026 | Student Job

- Developed and maintained Aarhus University web pages for international audience using Typo3, HTML, JavaScript and CSS - with a focus on usability, accessibility, SEO, and consistent UX.

Senior Software Design Engineer

Schneider Electric | Bangalore, India | Dec 2023 - Aug 2024 | Full Time

- Built interactive and responsive energy-management applications using Angular, TypeScript, and RxJS integrating Spring Boot REST APIs end-to-end, with a focus on responsive UI, clean component architecture, and optimised frontend performance.
- Achieved up to 100%-unit test coverage across key modules using Jest and Karma.
- Developed and migrated of 20+ legacy AngularJS components to modern Angular, applying frontend architecture best practices and preserving all existing functionality.

- Collaborated cross-functionally to translate user requirements into UX/UI solutions, applying Figma for design and ensuring delivery from concept through to launch.

Software Engineer/Senior Software Engineer

Tata Elxsi | Bangalore, India | Jan 2022 - Dec 2023 | Full Time

- Developed enterprise healthcare operations applications and IT solutions using Angular and the .NET framework, working with complex business and technical requirements.
- Optimised frontend performance across key application modules, reducing initial load time by approximately 30% through lazy loading, code splitting, and bundle optimisation.
- Debugged API and UI code; performed analysis using Datadog and Burp Collaborator.

Software Engineer

H&R Block | Trivandrum, India | Jul 2019 - Jan 2022 · Full Time

- Contributed to the modernisation of a legacy tax-preparation platform, transitioning from a client-server architecture to a cloud-native web application using Angular micro-apps and C# APIs.
- Translating business requirements and Figma designs into production-ready UI.
- Contributed to critical tasks such as Nx Workspace and Angular upgrades, SonarQube implementation, and Karma/TsLint migrations and multiple feature implementations.
- Mentored teammates and I internal technical sessions and webinars, driving knowledge sharing across the team; conducted client demos during sprint reviews.

TECHNICAL SKILLS

Frontend	Angular, TypeScript, React, JavaScript, HTML, CSS, SASS, Bootstrap, Tailwind, RxJS, Tailwind
Backend & APIs (basic)	C#, .NET Core, Java, Spring Boot, REST APIs, Swagger, Postman, Node.js
Data & Databases	SQL, MongoDB
Data & AI	Python, Machine Learning, PyTorch, AI/LLMs, SQL, Jupyter Notebook, Data Analysis, Data Visualization, Plotly, Dash
Testing & Code Quality	Jest, Karma, ESLint, TSLint, SonarQube
DevOps & Tools	Figma, Git, Docker, Azure, GitLab CI/CD, Jenkins, SonarQube, Jira,

VOLUNTEERING, INTERESTS & LANGUAGES

- Circle U. Ambassador for Aarhus University (2025 - 2026)
- Aarhus University Student/Alumni Ambassador Network (2024 - present)
- Block Cheers, Class Representative (CGPU), Fourth Year Representative (CSI) and other various volunteer roles

Languages: English (Fluent) | Danish (Currently learning)

Interests: Public speaking, volunteering, dancing
